

## OXYPRO

The first air pump  
with DOUBLE SILENCE chamber

DOUBLE SILENCE chamber  
and electronic control components ensure  
noiseless operation together with efficiency of 50 l/h  
and only 2W energy consumption.

## OXYPRO 150 – hear the silence

We would like to inform you that a new product joined **AQUAEL's** offer – modern, ultra quiet **OXYPRO 150** aerator.

Despite the fact that in the last decade the function of water aeration was partially taken over by aquarium filters, the aerator, also called by the name of buzzer, is still the basic equipment recommended for every aquarium. Its functionality is defined by two characteristics: efficiency and loudness of operation. The latter one, being just a constant, monotonous buzzing, gave the device its former popular name (“buzzer”). However it is the past now: the new **AQUAEL** aerator does not by any chance deserve to be called a “buzzer”. The device is virtually inaudible. The effect was achieved by a special construction of the electromagnet as well as double walls of the enclosure. All of the vibrations are dampened by the body consisting of a few independent, accurately connected elements. They dampen not only the noise, but also the movement, thanks to which **OXYPRO** is not only quiet, but also does not change its position due to emitted vibrations (it is a common affliction of many models of aerators). In practice the only manifestation of new **OXYPRO** operation is an illuminated LED and a stream of bubbles floating in the tank. There is a quite large number of the latter ones as the maximum efficiency of the device is as much as 150 l/h. It can be easily adjusted using a large, ergonomic knob to adapt the aerator operation intensity to the needs of a particular aquarium. Furthermore, the aerator is adapted to be used in case of extremely deep aquaria – it is capable of pushing air as much as 2 m below the level of water surface! Additional advantage of **OXYPRO** is a modern look: the double, yet transparent, casing allows to see the insides of the device including its moving membrane. All of that was achieved while keeping small size of the device as well as exceptionally low power consumption of as little as 2 W.

New **OXYPRO** is an ideal solution for aquarists valuing the highest comfort of usage of aquarium equipment and superior quality of its manufacture combined with innovative technical solutions.

- extraordinarily efficient
- practically inaudible
- step less efficiency regulation
- diode signalling that the device is operating
- futuristic shape
- reliability and longevity of operations

**ELECTRONIC EFFICIENCY REGULATOR**

**INNOVATIVE CHAMBER DOUBLE SILENCE**

**ON LED ILLUMINATION**

**VIBRATION FREE DAMPING FEET**

OXYPRO	150
Wattage [W]	2
Max Flow Rate [l/h]	150
Pumping depth [cm]	200
Product Code	111144
EAN Code	5905546140973

FOR  
**20-150**  
LITRES  
AQUARIUM

ONLY  
**2**  
WATT

MAX  
**150**  
L/H
