

2-in-1 aquarium lamps offer a new solution for creating favourable lighting conditions in nano tanks. They are notable for a stylish modern look and very low power consumption. The lamps are easy to install thanks to the single holder.

#### ENERGY-SAVING

POWER CONSUMPTION OF 2 X 5 W

#### COMBINED SOLUTION

EACH LAMP COMBINES TWO KINDS OF LIGHTING

2 in 1

#### ERGONOMIC

ADJUSTABLE HANDLE

#### IDEAL LIGHTING

THE LAMPS DO NOT DISTORT THE NATURAL COLOURS OF THE TANK INTERIOR

**NEW!**

**PRODUCT OF POLAND**

#### DURABLE

UP TO 50 THOUSAND HOURS OF OPERATION

#### FASTER GROWTH

THE LAMPS BOOST THE GROWTH OF AQUATIC PLANTS / CORALS

#### VERSATILE

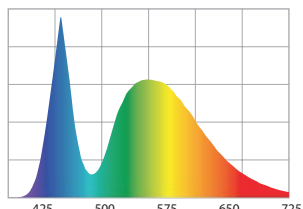

SUITABLE FOR CUSTOM-SIZE TANKS WITH A LENGTH OF 20-50 CM

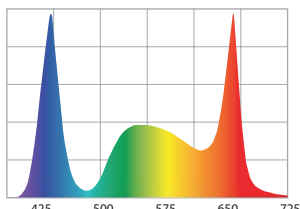

## SUNNY & PLANT

Aquarium width: 20-50 cm  
Power: 10 W  
Trade pack: 6 pcs  
Product code: 115151  
EAN: 5905546309738

6500K

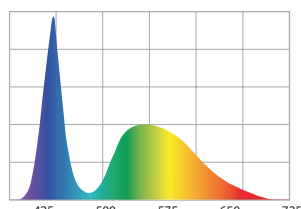

8000K

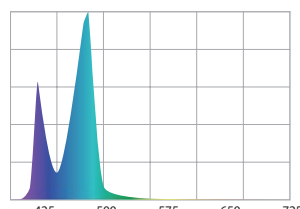

## MARINE & ACTINIC

Aquarium width: 20-50 cm  
Power: 10 W  
Trade pack: 6 pcs  
Product code: 115152  
EAN: 5905546309745

10000K

ACTINIC

Designed especially for freshwater aquariums, the lamp contains two rows of LEDs with a total power of 10 W (2x5 W). Half of them are SUNNY diodes, emitting light that is similar to natural sunlight, and the other half are PLANT diodes, designed for plants.

Designed especially for marine aquariums, the lamp contains two rows of LEDs with a total power of 10 W (2x5 W). Half of them are the MARINE diodes, emitting a strong white light that provides excellent conditions for the growth of corals. The other half are ACTINIC diodes, emitting a blue actinic light that enhances the colours of marine animals.
