The fully equipped **AQUA4** aquarium sets are available in two versions: one with a rectangular front wall and the other with an oval one. A part from the fish tank, each set includes an exceptionally durable injection-moulded lid with inbuilt lighting and a flap for fish feeding; an automatic heater; a carefully chosen high-performance internal filter. The lid is equipped with the SMART OPEN system, which eliminates the need for hinges and props in order to raise the lid.
